Linear System Configurations

"The Linear System Series places people at its center, being a place to meet, to collaborate or to work in focused solitude. The design process was about creating a system that made for intimately welcoming atmospheres, enhanced by the expression and functionality of its lighting and accessories. With its warm materiality and modern expression, the Linear System Series brings feelings of home into larger spaces to give the user a sense of belonging, even if being there only for a little while. The extensive selection of lighting and accessories means that the Linear System Series can be configured and reshuffled for any purpose of the modern workplace as well as hospitality settings and public areas, arrying the ideas of aesthetic and function into one."

Description	The Linear System Table is a simple yet refined table with subtle details and references to the Scandinavian design heritage. Its legs are cut into half-circles and joined with the table for a light expression while the slender overhang at both ends of the table makes for a refined expression.
	The Linear System Table is available as a freestanding table to be used on its own, as predesigned configurations or as Middle and End Modules that can be configured to the exact needs of your space.
Material	Tabletop in Oak Veneer, Black version in Ash Veneer, Black Nanolaminate or White Laminate. Black Nanolaminate and White Laminate has an ABS edge. It is not possible to mix multiple tabletop finishes in a Linear System configuration.
	Table frame in veneered plywood and legs in Solid Oak. Felt glides included.
	Oak Veneer color variations: The Oak Veneer tabletops of the Linear System Series are made using high-quality mix-matched veneer to reduce differences in the visual appearance from tabletop to tabletop. However, wood is a natural material, and this means that slight variations can occur from table to table.
